

## OVERVIEW

The flight fare prediction using Machine
Learning dataset using essential
exploratory data analysis techniques then
will draw some predictions about the price
of the flight based on some features such
as what type of airline it is, what is the
arrival time, what is the departure time, what
is the duration of the flight, source,
destination and more.

## CONCLUSION

Data visualization as well so after these steps one can go for the prediction using machine learning modelmaking steps.

## FLIGHT BOOKING PECISIONS THROUGH MACHINE LEARNING PRICE PREPICTIONS
